Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	N/A
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	No
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Personalized-Networking-Assistant

```

├── backend/
│   ├── app.py
│   ├── models/
│   ├── routes/
│   ├── services/
│   └── utils/
├── frontend/
│   ├── app.py
│   ├── pages/
│   └── assets/
├── models/
│   ├── distilbert/
│   └── gpt2/
├── data/
├── requirements.txt
├── README.md
├── .env.example
├── .gitignore
└── LICENSE
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Deploy Url
Login Credentials (Demo)	No Login Required
Platform / Hosting Provider	Render
Repository Link	Git-Repo Url
Demo Video Link	Demo-Url link

Step 4: Run Instructions

Pre-requisites

- Python 3.10+
- Internet Connection
- Git
- VS Code

Step 1

Clone the repository from GitHub.

```
git clone https://github.com/garikapatisrikari/Personalized-Networking-Assistant.git
```

Step 2

Install dependencies.

```
pip install -r requirements.txt
```

Step 3

Configure the required environment variables (if applicable).

Step 4

Run the FastAPI backend.

```
uvicorn backend.app:app --reload
```

Step 5

Run the Streamlit frontend.

```
streamlit run frontend/app.py
```

Step 6

Open the application in your browser and start using the **Personalized Networking Assistant**.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Internet connection required	Active
2	AI-generated conversation suggestions may vary based on the event description and user input.	Expected AI behavior
3	Slight delay may occur while processing AI models and fact verification requests.	Optimized through efficient backend processing
